

SAFETY NETS

RELIABLE FALL PROTECTION

Tufsafe™ machine-made braided nets and polypropylene (PP) knotted nets are engineered for high performance and reliability, ensuring a safe working environment across a range of industries. As the most trusted and widely used fall protection systems, these safety nets are designed to minimize the impact of falls by effectively absorbing the force and weight, helping to protect lives on the job.

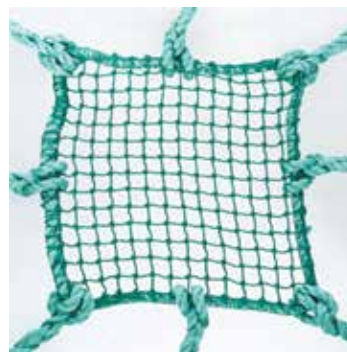

Conforming to stringent Indian and international safety standards, Tufsafe™ safety nets undergo rigorous quality testing to ensure superior performance. Tufsafe™ nets are a safe, cost-effective solution for fall prevention in construction, maintenance, demolition, excavation, and more.

Features

- Available in braided, twisted and knotless netting
- Can be supplied along with debris arresting netting
- Equipped with high strength border ropes and tie cords for easy and reliable installation
- Resistant to abrasion
- Heat treated for better knot stability and dimension stability with uniform mesh size
- Available in triple layers for better safety at high rise buildings

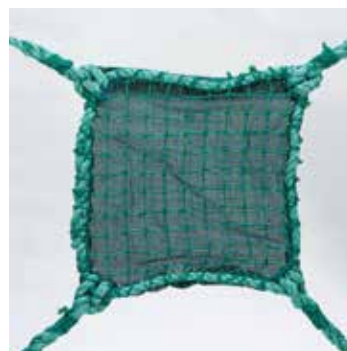

**Single Layer
PP Knotted Net**
Available in:
 • 4 mm rope net.
 100 mm sq. mesh

Single Braided
Available in:
 • 2.5 mm braided
 netting
 25 mm sq. mesh

**Double Layer PP
Knotted Net**
Available in:
 • Layer 1–4 mm
 polypropylene netting
 • Layer 2–Fishnet debris
 containment netting

Triple Layer Braided
Available in:
 • Layer 1–2.5 mm
 braided netting.
 25 mm sq. mesh
 • Layer 2–Fish net
 debris containment
 netting
 • Layer 3–
 Monofilament
 containment net
